AI Agent Developer — RAG Engineer

Building multi-agent AI systems, RAG applications, and scalable data-driven software.

Education

Bachelor of Technology (B.Tech), DEPSTAR, CHARUSAT University 2024 – 2028
CGPA: 7.91

Technical Skills

Languages: Python, JavaScript, TypeScript, C++, SQL
AI/LLM: LangGraph, LangChain, LangSmith, RAG, LLM Applications, Vector Databases, Embeddings
Frameworks: FastAPI, React.js, Next.js, Node.js
Databases: ChromaDB, SQLite, MongoDB, MySQL, Supabase
Tools: Git, GitHub, REST APIs, Postman

Experience

Frontend Developer Intern, Bull Agritech Dec 2025 – Present

- Developed and maintained production-grade web applications using React.js, Next.js, and TypeScript.
- Built scalable dashboard interfaces and reusable component architectures for data-driven business workflows.
- Integrated REST APIs and optimized client-side data handling, improving application responsiveness and user experience.
- Collaborated on feature development, performance optimization, and deployment of internal business tools.

Projects

SupportFlow AI — Multi-Agent Customer Support Platform

- Developed a **multi-agent customer support platform** using LangGraph, orchestrating **6 specialized AI agents** for intent detection, customer intelligence, prioritization, knowledge retrieval, resolution, and escalation.
- Built a Retrieval-Augmented Generation (RAG) pipeline using **ChromaDB** to deliver context-aware responses from company knowledge bases.
- Implemented agent routing, shared state management, memory handling, and workflow orchestration for autonomous ticket resolution.
- Integrated Gmail API and Resend for automated email workflows, ticket updates, and escalation handling.
- Engineered real-time AI interactions using FastAPI and Server-Sent Events (SSE) for low-latency response streaming.

Nexus RAG — Retrieval-Augmented Generation System

- Built an end-to-end RAG application using LangChain, Groq LLM, and MiniLM embeddings for document-grounded question answering.
- Developed a custom **JSON-based vector store** with cosine similarity search and Top-K semantic retrieval.
- Implemented PDF ingestion, document chunking, embedding generation, and retrieval pipelines from scratch.
- Optimized retrieval quality through context engineering and relevance ranking, improving answer accuracy and grounding.

Hackathons & Competitions

- **Runner-up — GDG Sprintathon Hackathon**, Top Contributor.
- **Team Leader — Odoo Hackathon**, ranked among top teams (19,000+ participants).

Achievements & Certifications

- **NPTEL DBMS (IIT Kharagpur) — Elite (Top 1%), Score: 85%**
- Solved 125+ problems on LeetCode.
- Certifications: Google Data Analytics, Meta React, Core Java, PHP.
- Certificate Repository
